Parental Consultation Survey for a new Primary School with Nursery

Introducing Making Education a Priority (MEaP)

Who are we?

We are a consortium of supplementary schools called MEaP (Making Education a Priority). We were constituted in 2015 and our company number is 09660017. Our website can be found at www.meap.org.uk

What is our background?

We came together as a consortium of schools in 2013 after a Manchester Metropolitan University (MMU) conference called Making Education a Priority, at which Diane Abbott was the keynote speaker. Since then, we have focused on how we can raise the teaching standards at our schools by sharing best practice but also with the development of a MMU Level 7 PG Cert in Teaching and Learning that upskills our teachers in Learning, Teaching and Assessment, as well as School Leadership and Management skills.

What do we do?

Our consortium delivers KS2 (and nursery 'school readiness'), KS3 and KS4 classes in English, Maths and Sciences. We also deliver KS3 French. Each of our schools delivers their classes on Saturdays between 10am and 1pm. However, since we established our twice-weekly Twilight School at the Brooks Campus at Manchester Metropolitan University between 5.30 – 8pm for our KS3 and KS4 provision, many of our schools have decided to use these weekly session for their academic teaching, leaving their Saturday sessions open for high quality extra curricula activities.

What are our plans?

We are currently looking for a venue in the Failsworth and Chadderton areas in Oldham to house our Primary and Nursery educational activities. We are also looking at forming a Single Academy Trust to set up a Primary Free School with Nursery. In terms of our Free School, we are working with the New Schools Network and have successfully won a place on their School Development Programme. We have been working on our vision and assembling our team and we are just about to launch our community consultations.
